

Horizon matching on real DROID recordings

Validation only · 12 full 30-epoch runs · selected epoch 1 for every model

a Match the training horizon

h10-trained – h5-trained · mean of steps 1-10

Reduction

b Compare equally h10-trained models

ShiftWM (ours) – Framewise

Reduction

Secondary: ours, matched h5 mean -0.116% (CI includes zero)
