

PushT · where the successful execution differs

Development episode 2031024 · matched goal/support · positive case

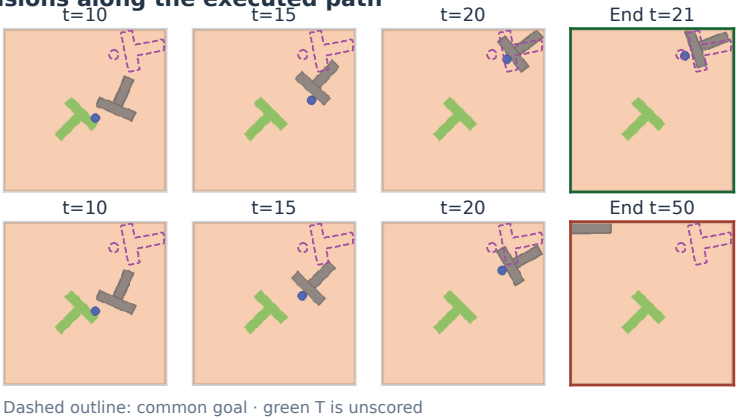

A Observe the decisions along the executed path

ShiftWM (ours)

Goal reached

Frame-wise

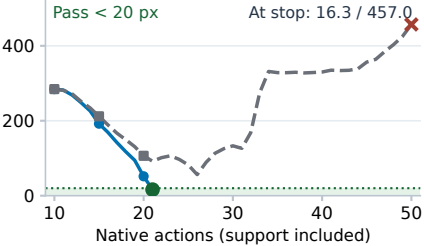

Goal missed

Dashed outline: common goal · green T is unscored

B Both goal conditions must pass at the same time

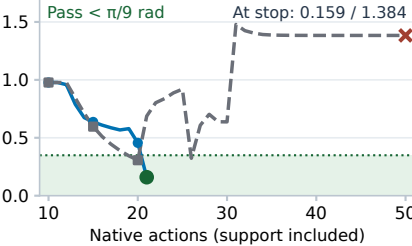

Combined position error (px)

Pass < 20 px

At stop: 16.3 / 457.0

Block-angle error (rad)

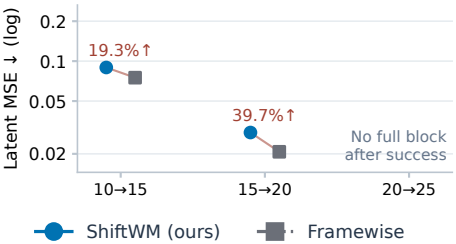

Pass < $\pi/9$ rad

At stop: 0.159 / 1.384

C Same observed transition, two prediction models
